Pathwidth of G(n, c/n) with c growing: floors (blue), ceilings (orange), proved values (ink)
exact pathwidth: median, min–max
finite inequality, exact: largest k with P(pw ≤ k) ≤ 0.05
n − α(G), mean
degree-sequence term, mean
n = 30
n = 40
n = 50
n = 60
value / n
c = np
c = 3
√n
2 ln n
n^0.7
p = ½
Theorem M: 1 − 4 ln c / c
β*(c), Theorem A
